

HOW TO GET FILM INTO TEAM NATION

Import Hudl Clips

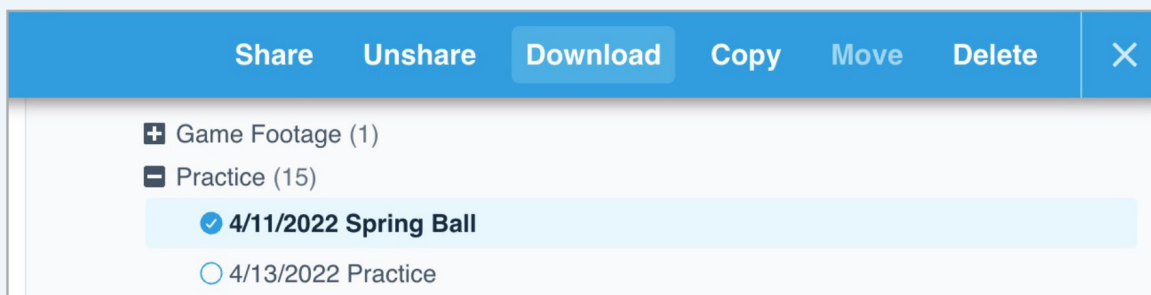

There are multiple ways to **download hudl** clips in to team nation.

Depending on your version of Hudl, you can click the “**settings gear**” and then click **download**. Make sure you select the option download as multiple clips. If you have an older version of hudl, you will need to click **the Video tab** and navigate to “**Manage Library**”.

Click the specific clip you want to download or select multiple and then click “**Download**” on the top Hudl helper toolbar.

Screen Record Your Clips

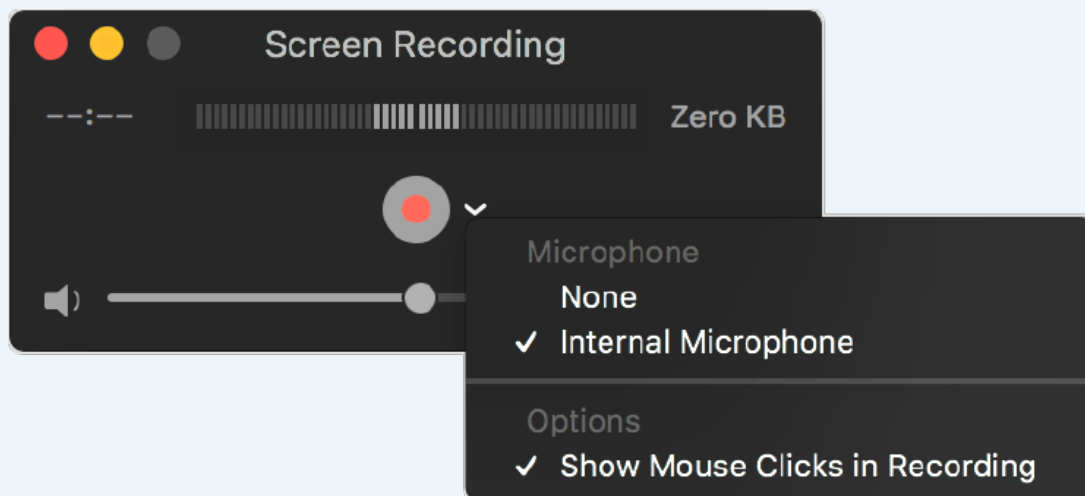

To screen record a clip on a MAC: Click and hold the hot keys - **Command** + **Shift** + **5**. You will see the selection tool pop up. **Click the section tool** (dotted with record screen) and then **click record**.

Once you have the desired clip length you can click to stop recording, click the **Stop** button in the menu bar, or **press Command-Control-Esc (Escape)**.

You can also use **quicktime player**

1. **Open QuickTime Player** from your Applications folder, then choose **File > New Screen Recording** from the menu bar. You will then see either the onscreen controls described above or the Screen Recording window described below.
2. Before starting your recording, you can click the arrow next to the Record button  to change the recording settings:

To record your voice or other audio with the screen recording, choose a microphone. To monitor that audio during recording, adjust the volume slider. If you get audio feedback, lower the volume or use headphones with a microphone.

- To show a black circle around your pointer when you click, choose **Show Mouse Clicks** in Recording.

3. To start recording, click the **Record** button  and then take one of these actions:

- Click anywhere on the screen to begin recording the entire screen.
- Or drag to select an area to record, then click **Start Recording** within that area.

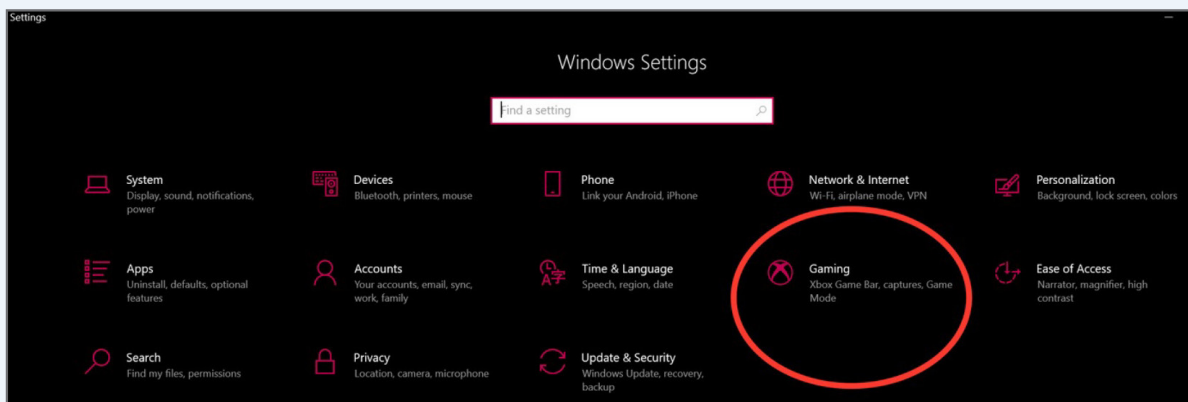

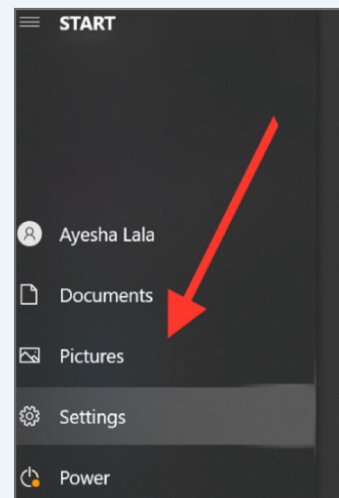

How to screen record on Windows 10?

On Windows 10, you can record your screen using the built-in tool - **Game Bar**. It was designed essentially to capture PC and Xbox gaming sessions, but it can also be used to record other apps and activities.

First, enable **Game Mode** on your system:

Step 1: Click on the start menu and then select settings ►

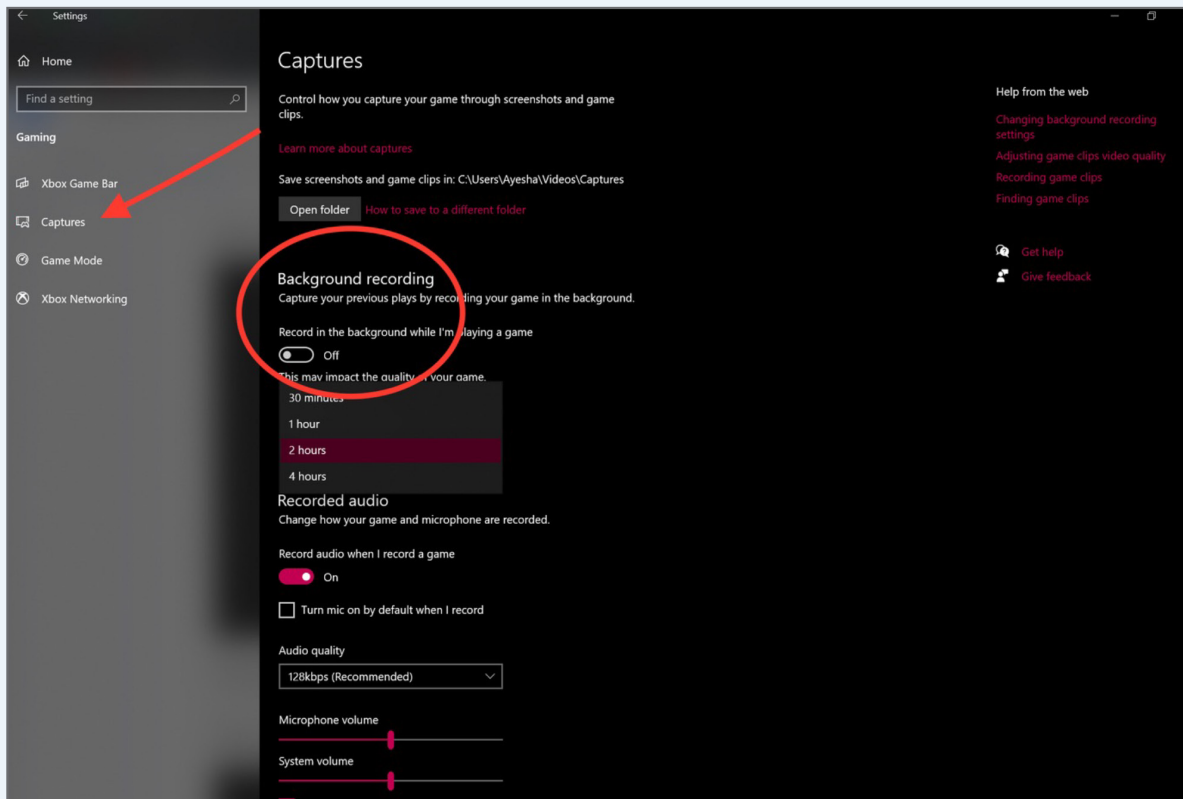

Step 2: From the Settings window, Click on **Gaming**. ▼

Step 3: Go to Game Mode and enable Game Mode ▼

Note: To check the maximum duration of how long a screen recording can be, head over to **Game Bar's settings**. Click on the **Start menu** and hit **Settings**. Click on **Gaming**. Under **Captures** will be the option for **Background Recording**. Select from the maximum recording time drop-down from 30 minutes to 4 hours.

Now you're all set to record your screen. Windows 10 Game Bar can only support screen recording of one application at a time. This means, you can't switch to recording another window or ALT + TAB your way after you've started recording. Also note that you cannot record your Desktop or File Explorer or Maps.

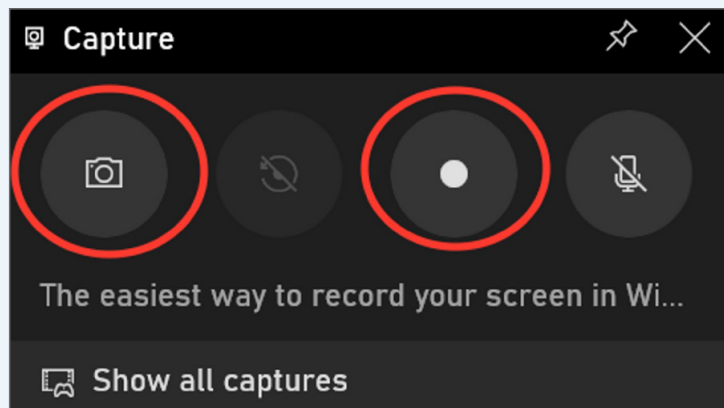

With that, let's get down to the steps you can use to record your screen using the Game Bar.

Step 1: Open the app you want to record.
Close other windows and make sure there's no unwanted audio that will sneak its way into your recording.

Step 2: Press the **Windows + G** on your keyboard. This should open up the Game Bar.

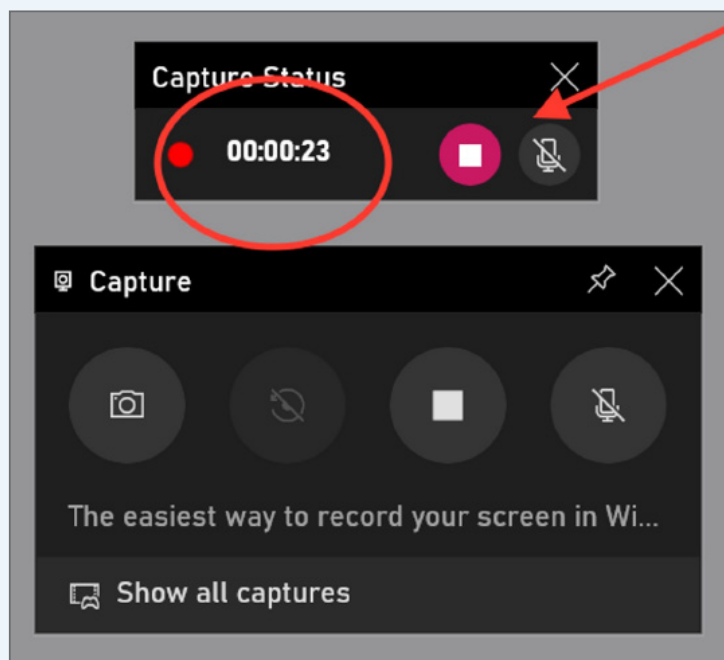

Step 3: In the 'Capture' window, click on the **Camera icon** to take a screenshot. To start recording your screen, click on the circle with the dot (or press **Windows + Alt + R**).

Step 4: Once you start recording, a capture status with a timer, recording controls and a microphone will appear. The mic is to switch on and off external sounds to record commentary. Internal sounds will be recorded by default.

Step 5: Click on the stop button or press **Windows + Alt + R** again to stop recording.

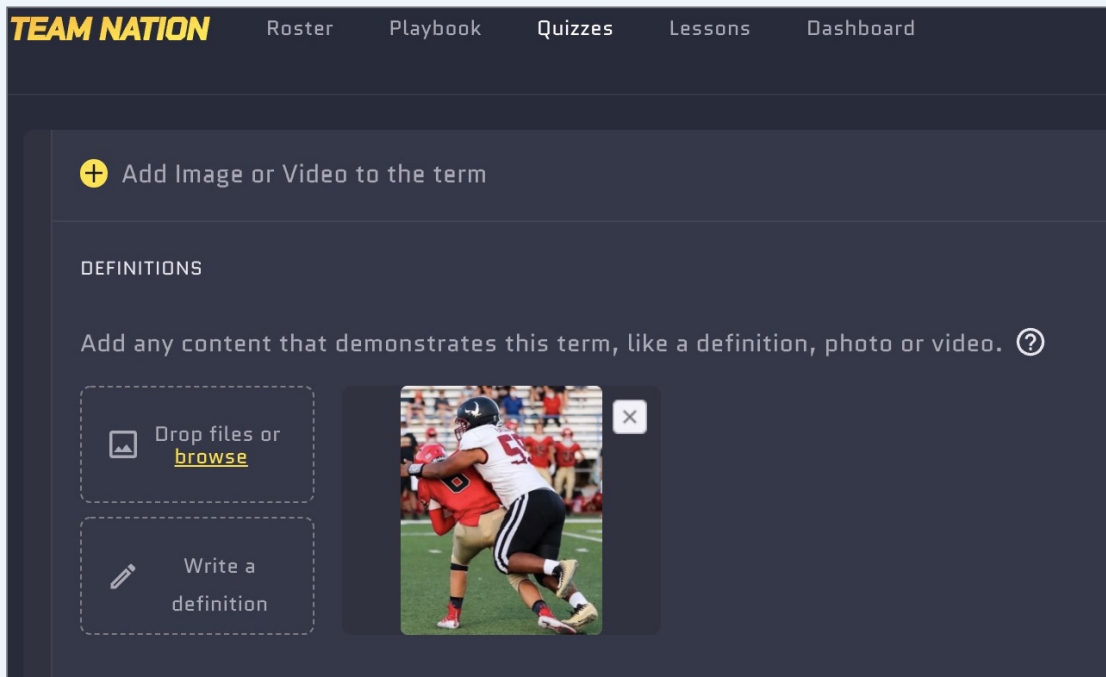

Step 6: A pop up will appear on the right side saying 'Game clip recorded'. Click on the pop-up to see that your screen recording is saved in the 'Captures' folder in File Explorer.

Adding Desired Clips to Team Nation

Once you have the desired clips, add them to any quiz

Or any lesson by clicking the “Add Section” followed by the “Media” selection.
